The offense groups are described below.

**Crimes Against Persons:** Criminal offenses where the victim is present and the act is violent, threatening or has the potential of being physically harmful.

|                    |                    |
|--------------------|--------------------|

| Negligent Homicide | Robbery            |
| Rape               | Aggravated Assault |
| Other Sex Crimes   | Simple Assault     |

**Crimes Against Property:** Criminal offenses that involve taking something of value by theft, deception or the destruction of property.

Although not necessarily violent or property offenses in themselves, they may often contribute to other criminal acts.

## **INDEX CRIME RATE** (see page 1-12)

The Crime Index was developed in the 1920's as a means of measuring crime on a national scale from one year to the next. Because laws define crimes differently between the individual states, 8 specific crimes were chosen to make up the Crime Index rather than including all reported crimes. The 8 crimes that make up the Crime Index are: Willful Murder, Forcible Rape, Robbery, Aggravated Assault, Burglary, Larceny (Theft), Motor Vehicle Theft and Arson. These 8 crimes were selected because they are generally defined the same by each state.

The Index Crime Rate is the "official" measurement of crime used nationally.

## TEN YEAR CRIME RATES BY CRIME CATEGORY

The chart below represents the rate of all crime (the 8 Index Crimes as noted on page 1-4 plus all other types of crime), by crime category, per 10,000 in population. Crime rates are based on simple averages. For example: in 2012 Oregon's population was 3,883,735 and there were 36,712 Crimes Against Persons (violent crimes). That means is that for every 10,000 people, there were an average of 94.5 Crimes Against Persons.

A key point to remember is that while the actual number of criminal offenses may increase from one year to the next, generally the population increases, as well. This means that the number of criminal offenses may possibly be higher in 2012 than in 2003, but with the increase in population the actual rate of crime per 10,000 in population can be less.

In 2008 new software and hardware were installed which affected the way some crime statistics are tallied. This chart is divided into 2 sections in order to take the slight differences caused by this change into account. Data for 2008 was processed on both the older system and its replacement. The result is reflected in the chart below which shows crime rate trends from 2003 through 2008 and again for 2008 through 2012.

Further information on crime rates by crime category can be found in sections 2, 3 and 4 of this report.

## **OREGON BIAS CRIME STATISTICS SUMMARY**

### **January through December 2012**

Commonly referred to as "hate crimes", bias crimes are those incidents where the offender's motivation for committing the offense is based on a prejudice against the victim's perceived race, color, religion, national origin, sexual orientation, marital status, political affiliation or beliefs, membership or activity in or on behalf of a labor organization, or against a labor organization, or a prejudice against the victim's physical or mental handicap, age, economic, social status or citizenship.

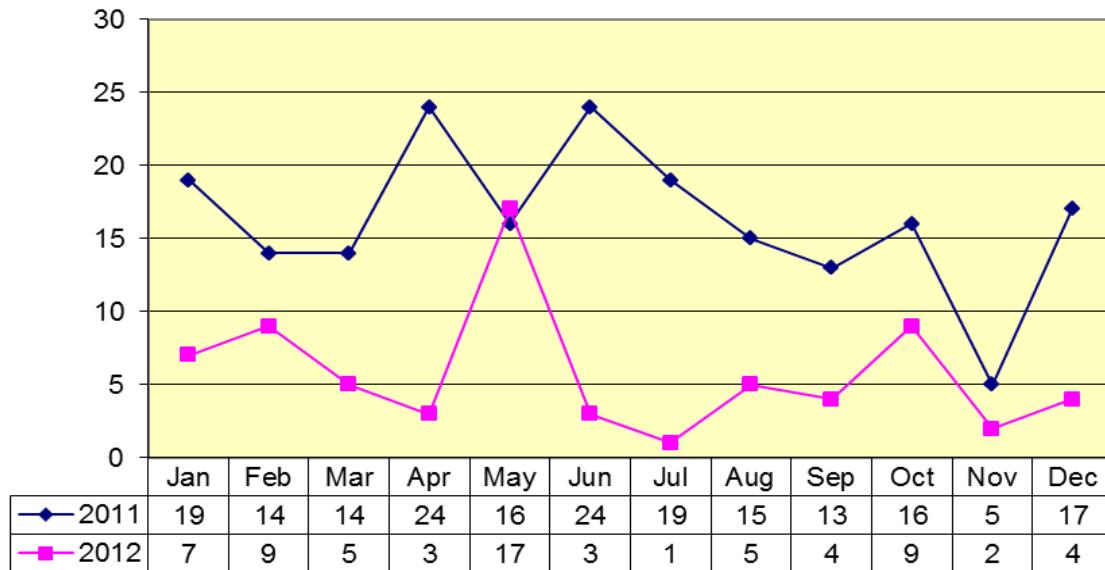

Simply because an offender and a victim are of different races does not necessarily indicate a bias crime has been committed. What motivated the offender to commit the crime is the determining factor. Did the offender have a bias, or hatred of the victim's race, or was the victim simply the offender's next target regardless of race? Was a victim's vehicle vandalized because of the victim's sexual orientation, or because the vehicle was an easy target parked in the street?

These questions, and questions like them, must be answered in order for law enforcement investigators to determine if an incident is a bias crime.

## **SECTION 8**

### **AGENCY SUMMARY**

**and**

### **DETAIL TABLES**

This section provides a detailed report by crime category of the annual crime report information for each department within each county in Oregon, including Traffic Crime, Fish & Game Laws, and Marine Violations.

#### **SPECIAL NOTES:**

When counting arrests, only those arrests which are made for an agency's own cases are counted for purposes of this report. In cases of multiple arrest charges being brought against an individual in a single given incident, only the most serious charge is counted. The number of arrests shown in this report will not necessarily agree with the statistics obtained directly from a department that may opt to count all arrest charges in every incident.

Index Crime is summarized at the bottom of the page. The individual crimes that make up the National Crime Index are each identified with an asterisk (\*).

In past years, we included a "Cleared" column in this report. An offense is "Cleared" when an arrest is made, or the law enforcement agency has taken an investigation as far as it possibly can. Examples of clearing offenses without making an arrest would be where the offender had diplomatic immunity and could not be arrested, or the offender died prior to law enforcement being able to locate and arrest him/her.

It may seem logical that reporting the number of incidents a law enforcement agency "clears" during the year would be a good measure of how well the agency is doing its job. However, because criminal investigations frequently extend from one year to the next (and sometimes may go on for several years), accurately reporting clearance rates is nearly impossible. For this reason, reporting the number of clearances a given agency may make in a single year tends more to create confusion than it does to act as a standard to measure the agency's effectiveness. For example, a law enforcement agency may investigate 10 burglaries in a given year and "clear" only 1 of them during that same year. The Annual Report for that year would show 10 burglaries with only 1 clearance which would indicate only a 10% clearance rate. Most would interpret that as a sign of poor effectiveness by the agency in question. However, it is quite possible that the agency then cleared the remaining 9 burglaries the following year. This would actually make the agency's clearance rate 100% for those 10 burglaries. The problem is, since 90% of the burglaries were not cleared within the year that they occurred (and is the subject of the Annual Report), the published clearance rate would remain quite low and would incorrectly give a poor impression of the agency's effectiveness.

Because it is nearly impossible to accurately report the number of incidents that are cleared on an annual basis, clearances will no longer be included in this report.
