The February 20, 2005 roadbed was a major unpaved road located lower than the 1920 - 1921 paved Pacific Highway uphill.

The culvert at GIS site 7 is a major institutional culvert.

It is speculated that this road was developed sometime between 1904 and the 1910s prior to the paving of the Pacific Highway.

Its northern course is into Rat Creek along its east side.
